

Anudeep Debbata

Front-End Engineer | React.js | TypeScript | Redux | JavaScript (ES6+)

Bengaluru, India | +91 9347977431 Debbata.anudeep@gmail.com | linkedin.com/in/anudeep-d-5644711b8 | github.com/Anudepp

PROFESSIONAL SUMMARY

Front-End Engineer with 7+ years of experience building enterprise-scale SPAs at Walmart and Microsoft, specializing in React.js performance optimization, TypeScript migrations, and API integrations. Proven track record of reducing issue resolution time by 30%, improving Core Web Vitals, and leading end-to-end delivery of production-grade applications. Experienced in Agile teams, CI/CD pipelines (Azure DevOps), and cross-functional collaboration across the full SDLC.

TECHNICAL SKILLS

Frontend: React.js, Redux, React Router, JavaScript (ES6+), TypeScript, HTML5, CSS3, Material-UI, Bootstrap, Tailwind CSS

State Management: Redux, React Context API, useState, useReducer, useEffect, useMemo, useCallback

APIs & Data: RESTful APIs, GraphQL, Axios, Apollo Client, urql

Performance: Code Splitting, Lazy Loading, React.memo, List Virtualization (react-window), Webpack, Vite

Testing: Jest, React Testing Library, SonarQube, Chrome DevTools, Redux DevTools

Cloud & DevOps: Azure DevOps (YAML CI/CD), AWS (S3, Workspaces), Docker, ARM Templates, Terraform, Bicep

Methodologies: Agile/Scrum, WCAG Accessibility, Responsive Design, Performance Optimization, Unit Testing

PROFESSIONAL EXPERIENCE

Front-End Developer (Freelance) | Georges Exports (ministryofcoffeeaffairs.com) — Remote

Jan 2025 – Present

- Sole developer responsible for end-to-end design and delivery of a B2B coffee export company website using React.js, Vite, and Tailwind CSS — from wireframe to production deployment on GoDaddy.
- Improved Largest Contentful Paint (LCP) to under 2.5s and achieved 90+ Google Lighthouse performance score by implementing lazy loading, code-splitting, and image optimization.
- Configured React Router for seamless SPA navigation across 6+ pages with mobile-first responsive layouts ensuring cross-device compatibility and strong Core Web Vitals scores.

Software Engineer — Front-End | Walmart (via Orabase Solutions LLC) — Bentonville, USA

Dec 2021 – Jul 2024

- Built and maintained 15+ reusable React component libraries used across multiple internal applications, reducing UI development time by ~25% for downstream teams.
- Architected global state management using Redux and React hooks (useState, useReducer, useEffect), eliminating prop-drilling across 3 large-scale SPAs serving millions of Walmart users.
- Integrated RESTful and GraphQL APIs using Axios, Apollo Client, and urql — reducing average API response handling latency by 20% through efficient query batching and caching strategies.
- Boosted application performance by 40% through code-splitting, lazy loading, memoization (useMemo, useCallback, React.memo), and list virtualization with react-window on 10,000+ row datasets.
- Led TypeScript migration of 2 legacy React projects, enforcing static type checks that reduced runtime errors by 35% and improved overall code maintainability scores in SonarQube.
- Reduced production issue resolution time by 30% using Chrome DevTools, React DevTools, and Redux DevTools to identify bugs in complex asynchronous state flows.

- Increased unit test coverage from ~30% to 75% using Jest and React Testing Library; integrated tests into Azure DevOps CI/CD pipelines, cutting regression bugs in production by 20%.
- Improved accessibility compliance to WCAG 2.1 AA standard using semantic HTML5 and ARIA attributes, broadening application reach to assistive technology users.

Azure Support Engineer | Microsoft (via Orabase Solutions LLC) — Irving, USA

Oct 2019 – Nov 2021

- Supported Azure PaaS/IaaS applications (.NET, API Management, Service Bus, Event Hub) for enterprise clients, maintaining 99.9% SLA compliance across critical production environments.
- Developed IaC using ARM Templates, Bicep, and Terraform, automating Azure resource provisioning and reducing manual deployment effort by 60%.
- Built YAML-based CI/CD pipelines in Azure DevOps and authored Bash automation scripts, reducing release cycle time by 30% — expertise now applied to frontend deployment pipelines.
- Monitored application health using Azure Monitor, Application Insights, and Log Analytics; proactively resolved incidents before customer impact on 10+ enterprise accounts.

Software Engineer — UI | Cognitive Scale (via Orabase Solutions LLC) — Austin, USA

May 2019 – Sep 2019

- Resolved 20+ UI bugs across a data intelligence platform, improving visual consistency and responsiveness across mobile and tablet viewports.
- Supported AWS-hosted frontend applications integrating S3 and Workspaces, ensuring secure and reliable connectivity for end users.

Application Developer — Front-End | CBRE (via Orabase Solutions LLC) — Dallas, USA

Aug 2017 – Apr 2019

- Developed 10+ reusable React (v15) components for the AVA property management platform; integrated REST APIs for real-time property data used by 500+ property managers.
- Established Git branching and PR workflows that reduced merge conflicts by 40% and improved team collaboration velocity across a 5-person front-end team.
- Contributed to full Agile lifecycle — backlog grooming, sprint planning, retrospectives, and stakeholder demos — delivering features on schedule across 8 consecutive sprints.

EDUCATION

Master of Science in Computer Science | Fairleigh Dickinson University, New Jersey, USA | 2015 – 2017

Bachelor of Engineering in Electrical & Electronics | JNTU, Hyderabad, India | 2009 – 2013
